VERTICAL VESSEL

QUENCH OIL FRACTIONATOR

Transportation

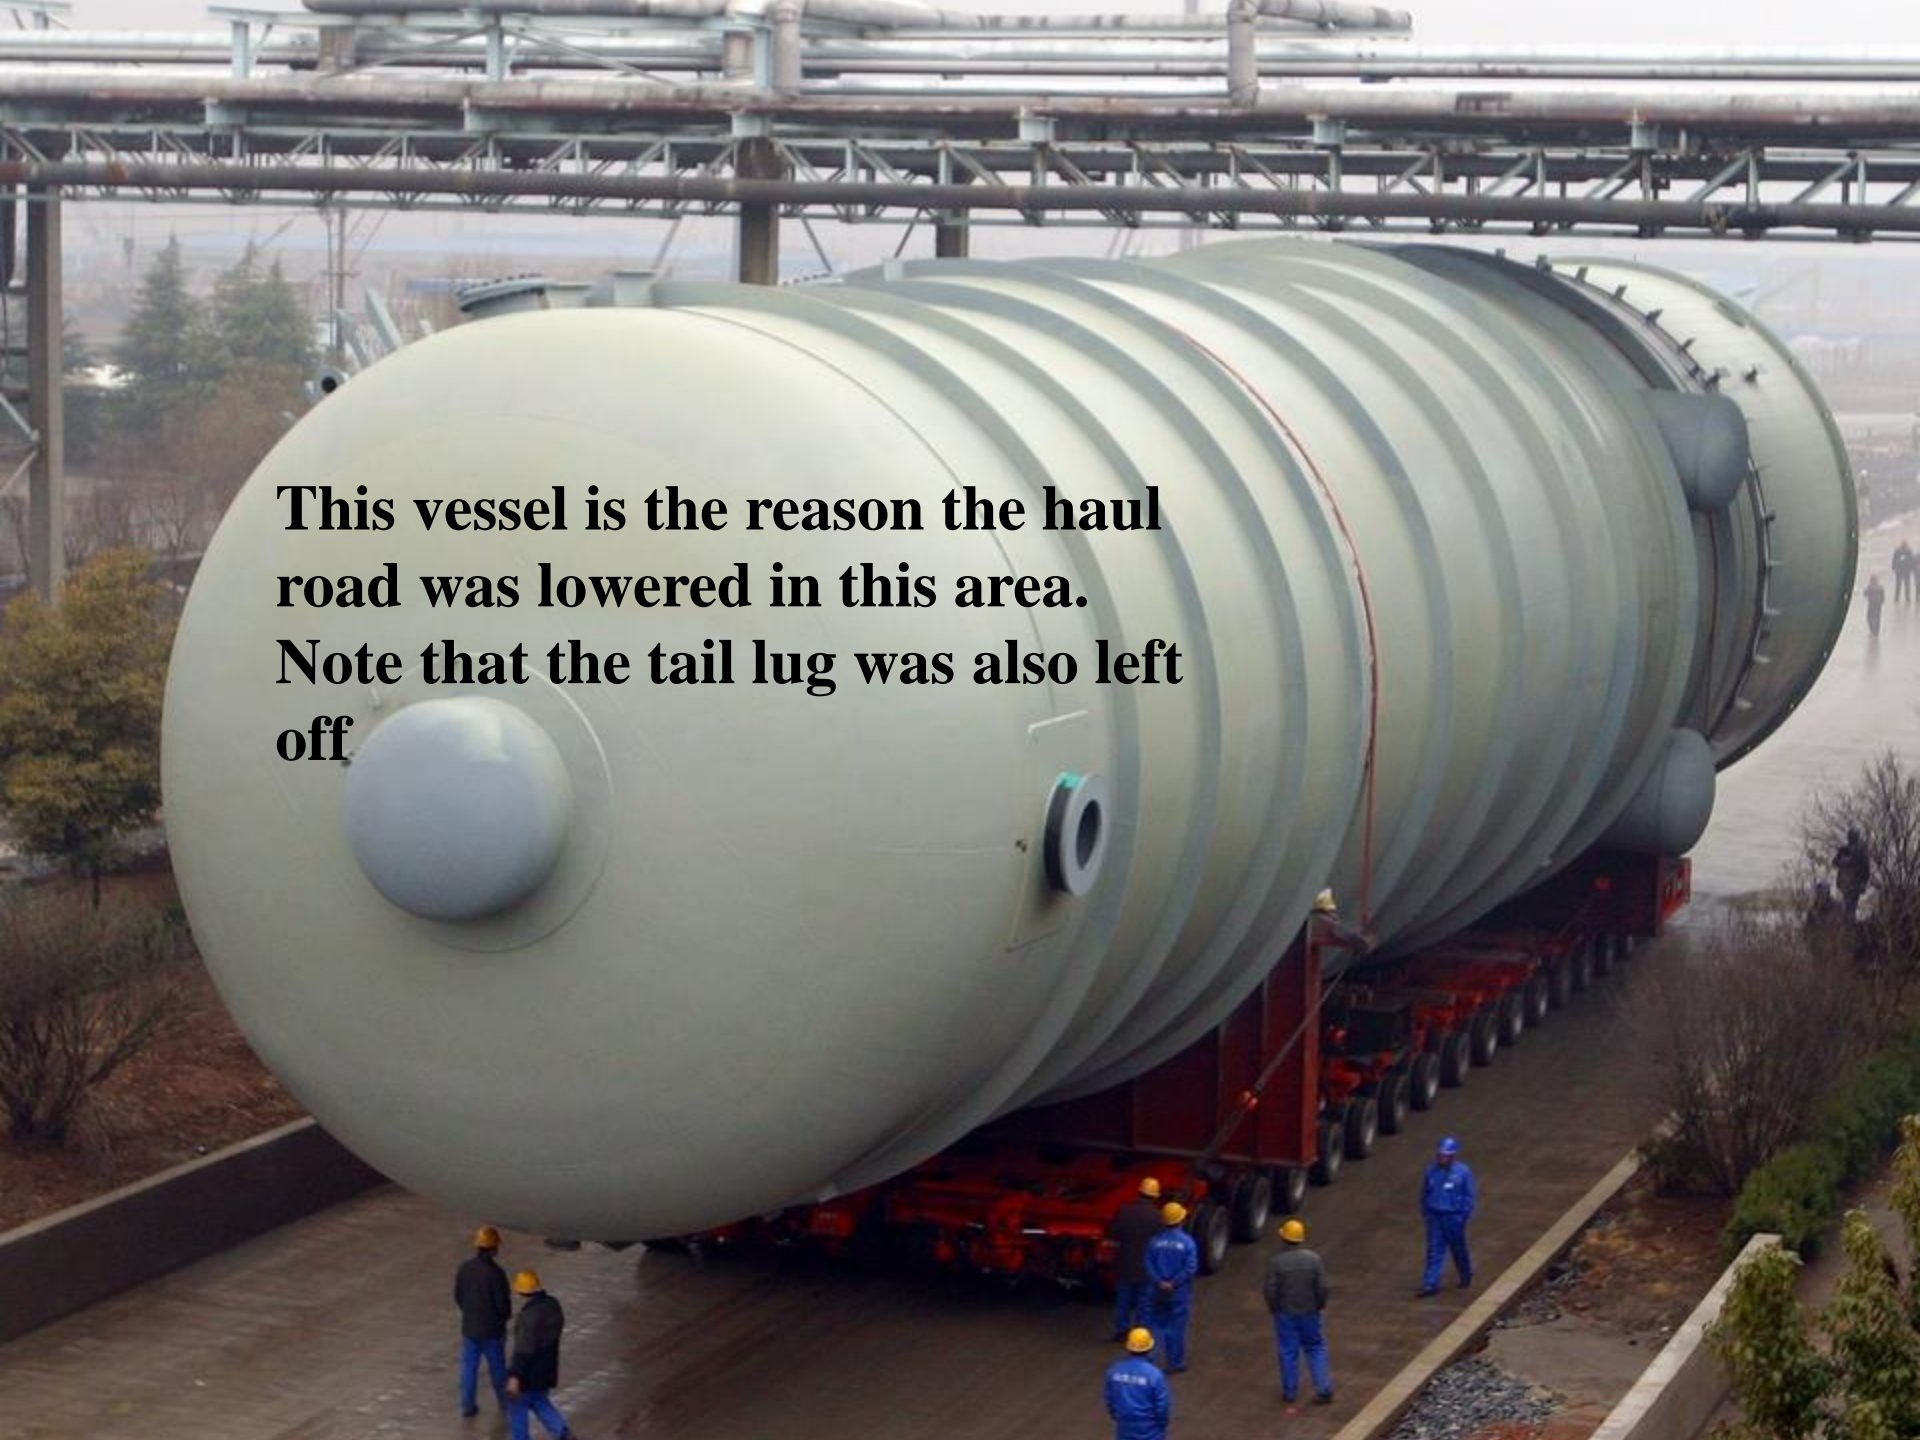

10.5 m x 44.0 m x 280 Te

(34.5' x 144.4' x 308 tons)

Erection

320 Te

(352 tons)

A large, light-colored, cylindrical industrial vessel with a ribbed texture is being transported on a multi-axle red trailer. The vessel is positioned on a paved road. Several workers in blue uniforms and yellow hard hats are standing around the trailer, observing the transport. In the background, there is a complex network of pipes and structural steel, suggesting an industrial or construction site. The sky is overcast.

**This vessel is the reason the haul road was lowered in this area.
Note that the tail lug was also left off**

**Demag CC-8800
lift crane**

Note the hydraulic stinger for changing the radius of the superlift from 19m to 25m

**Manitowoc M-250
tail crane**
